

Physics 110: Fall 2003

October 15, 2003

Second Writing Assignment:

Interview a TA, Coach or Professor, and write a professional biography of that person.

This week, line up the person and arrange for an interview. You can share the interview with other students in the seminar. We will discuss the results of the interviews on Wednesday the **22nd**. Your first written draft is due **Monday October 27th**, the final version is due **Monday Nov 3rd**.

Such biographies are normally written sequentially:

- Short introduction to the person now.
- What did they study in school, what jobs have they held and how did it relate to their current position?

Within the sequential narrative, topics to cover are:

- What do you need to do to become what they are now?
- What were they interested in when very young?
- When did they first become interested in what they are doing now?
- Did they make major changes along the way?
- Sources of inspiration?

The final paper should be around 5 pages long.
